Re: ISP Whitelist Request

Daily Maverick is an online news publisher, and we distribute daily news email communications to subscribers, who have opted in to receive our newsletters, sometimes up to three times per day.

Of late, we have been receiving bounces from your mail servers even though our client does want to receive these emails. We would appreciate your assistance in whitelisting our mail server domain or IP addresses.

Below are the addresses you can whitelist if you're having trouble delivering email from our software to your own network. Depending on your situation, you can whitelist sending domains or IP addresses.

Instead of whitelisting all of our sending IP addresses, you can whitelist our domains. They currently include cmail1.com through to cmail20.com

These are the IP ranges you can whitelist, should you prefer:

27.126.146.0/24
103.28.42.0/24
146.88.28.0/24
163.47.180.0/22
203.55.21.0/24
204.75.142.0/24

From email address: firstthing@dailymaverick.co.za

We hope you find the above in order and it would assist you in letting our mails through or alternatively giving us our rejection reasons so that we work on those areas.

Kind Regards

Styli Charalambous
