

MEMORANDUM

George Magoselle SACG = 1102 Ruk of A.N.C

EXT8

LANGAVILLE PROPER

TSAKANE WARD 79

27 February 2019

TO WHOM IT MAY CONCERN

The residents of the above mentioned area at Langaville Ward 79, under the leadership of councilor ZwelibanziNgwenya are turning to you for further assistance.

We as the residents living in the shacks are concerned. We have been living under these unbearable conditions for over twenty five (25) years. There is no sanitation, no clarity or way forward. This area is allocated among/in between the RDP houses but not approved. We are using bucket system, sharing a tap of water in the streets.

The residents are requesting and demanding your office to intervene **as soon within seven days**. We demand for the following;

- 1. Sanitation.
- 2. Approved stands.
- 3. Houses and
- 4. Roads

This is the oldest area (Ext8 Langaville) that have produced about seven to eight extensions in Tsakane but its living conditions are very unhealthy. The residents have decided not to participate in any elections and will lead to match if this is not attendant.

Attached please find with this memorandum all the concerned vulnerable residents who raised their families in fear due to weather, rainy windy, storm and suffocating in the bucket system. Your positive intervention will be highly appreciated. Please come visit the area and see for yourself
